MAI® 4EVERSUPER

MAI INTERNATIONAL®

THE INDIVIDUAL IS OUR MAIN CONCERN

GOOD IS NOT GOOD ENOUGH

MAI®4EVERSUPER

WE HAVE A WEAKNESS FOR STRENGTH

The MAI®4EVER SUPER is an advanced mortar mixing pump which was specifically designed for professional use. MAI®4EVER SUPER is the ideal solution to your problems wherever heavy materials, long transport distances and/or large feed pressures are required. If you value logical operation, easy cleaning and problem-free maintenance, then this machine will appeal to you.

THE REALMS OF POSSIBILITY HAD BEEN REACHED – SO WE HAD TO EXTEND THEM

- Operating pressures of over 40 bar
- Hose lengths of up to 60 metres
- Convenient cleaning due to the plastic lining of the entire mixing zone
- High added value due to the use of hot-dipped galvanised steel parts, stainless steel parts and high quality, three-dimensional cross-linked plastics
- Constant material consistency due to advanced water metering

STRENGTH IS NOT OUR ONLY STRENGTH

The strengths of the innovative conveyor mixing technology are best experienced during:

- Renovation work
- The processing of special screeds
- Injections
- Backfill work

UNIQUE AREAS OF APPLICATION

Mortar mixing pump with a special mixing zone for the processing of even the heaviest special materials such as industrial screeds, underwater concrete, monocapa, fibre-reinforced materials for concrete restoration and jointing work.

ACCESSORIES

- Silo transfer hood (the MAI®4EVER SUPER can be fed directly from the silo)
- Blowing device (the material is fed from a pneumatic conveying system)
- Injection pressure switch (adjustable from to 16 bar, 0 to 25 bar or 0 to 40 bar)

TECHNICAL DATA

Operating voltage:	400V/3/PE/50Hz
Nominal power:	6,8 kW; 8,2 kW
Fusing:	32 A
Delivery rate:	6 to 35 l/min
L x W x H:	195 x 71 x 134 cm
Filling height:	95 cm

WEIGHTS

Transport weight, basic unit:	144 kg
Drive unit:	60 kg
Pump with pump flange:	26 kg
Compressor (option):	26 kg
Total weight:	280 kg
